

KSJ D Series

Spherical Actuator Detect Switches

Description

The KSJ D series spherical actuator detect switch is a sealed switch, compliant with the IP60 regulations. Used by designers in the automotive, industrial electronics and computer infrastructure/IT industries, the spherical actuator of KSJ switches allows actuation of plus or minus 30 degrees. These switches are made for high travel – and are available with either a straight or vertical detect, or top or side actuation, helping them to fit any design.

Features & Benefits

- Straight or vertical detect
- High travel
- Top or side actuation
- Adapted for cam actuation
- Spherical actuator allows actuation +/- 30°
